The Vaccine Adverse Event Reporting System (VAERS) Results

- **Note:** "0" (zero) in any cell means that no observed case has been reported in the database.
- **VAERS data is in the MedDRA coding system.** Use caution when using MedDRA terms. Results reflect the current query and change from week to week.
- **Reports are coded to the MedDRA version in effect at the time of the report.**
- **When grouped by MEDDRA, results identify Short Listed Preferred Terms, Percent, or totals. Use Quick or More Options to change the grouping.**
- **Click on a MEDDRA term to view it according detailed information in the MedDRA browser.**

Count	Short Listed Preferred Term	Percent	MedDRA Version	Vaccine Name	Manufacturer	Serious	Hospitalized	Life Threatening	Disability	Death	Allergic Reaction	Congenital Anomaly	Cardiac Anomaly	Chronic Illness	Blood Disorder	Conditions Incl. Cancer	Immunosuppressive Condition	Myocarditis	Pericarditis	Myocarditis/ Pericarditis	Autoimmune Disease	Autoimmune Disease Incl. Arthritis

1100-Pa	2011	PHYSIOTHERAPY	ANNEES	Physiotherapy	Physiotherapy	Physiotherapy	2nd December 2011 Pa Pa Pa

	years			
1365365-1	50-59 years	JANSSEN	Resident received Janssen Covid 19 vaccination on 5/25. On 5/29, the resident died.	No prior vaccinations for this event.
1365404-1	50-59 years	PFIZER\BIONTECH	My husband past away	No prior vaccinations for this event.
1365410-1	50-59 years	MODERNA	ON 3/15/21 patient was found unresponsive by spouse. EMS was called. Patient was found to have cardiac arrest Was given Epinephrine, Amiodarone and External Ventricular defibrillation Patient passed away on 3/15/21	No prior vaccinations for this event.
1365516-1	50-59 years	JANSSEN	my friend died from this vaccine	No prior vaccinations for this event.
1366154-1	50-59 years	MODERNA	Death	No prior vaccinations for this event.
1369340-1	50-59 years	MODERNA	My brother took the day off work on May 12, 2021 to receive his 2nd dose of the Moderna vaccine. He communicated with friends later that same day saying he was tired and needed to rest. On May 13, 2021, a work colleague followed up with a text message to see how he was doing to which my brother did not respond. This same colleague went to his house a few days later to find him dead lying on his couch.	I have not seen the coroner's report, but another family member said that the cause of death was Cardiopulmonary Arrest due to Embolism with chronic kidney disease and hypertension contributing. No prior vaccinations for this event.
1369811-1	50-59 years	PFIZER\BIONTECH	Patient went swimming at a fitness center the day after he had his 2nd COVID-19 vaccine and was found unresponsive at the bottom of the shallow 4.5 deep pool while exercising. He was not able to be revived. The death certificate says that the immediate cause of death was Arrhythmia resulting from Hypertensive Atherosclerotic Cardiovascular Disease.	An Autopsy was performed. Awaiting the detailed results, however enough information was obtained to document a cause on the death certificate. No prior vaccinations for this event.
1371354-1	50-59 years	MODERNA	Patient developed dizziness, chills, fever, body ache, sore throat, difficulty breathing, and stopped eating beginning April 26, The adverse effect is the belief that a breakthrough case of Covid-19 will be less severe if you had the shots. A false sense of security.	Symptoms began on April 26. Contacted doctor on Wednesday, April 28 and appointment was made for Tuesday May 4. He died the day before his appointment, May 3. No prior vaccinations for this event.
1371420-1	50-59 years	MODERNA	patient expired 3 days after first vaccination. Did not present to our facility for care after vaccination; did not have any adverse reactions during vaccination waiting period. Per the Medical examiner, patient passed away at his residence, and his death was not related to the COVID vaccine.	none No prior vaccinations for this event.
1371537-1	50-59 years	PFIZER\BIONTECH	Received shot Tuesday afternoon Died Friday Morning	No lab data for this event. No prior vaccinations for this event.
1371720-1	50-59 years	MODERNA	Death, cardiac arrest. Patient was found deceased in home, no hospitalization, no autopsy	None No prior vaccinations for this event.
1371905-1	50-59 years	MODERNA	Adverse Event was Death within 48 hours of vaccine.	No lab data for this event. No prior vaccinations for this event.
1374138-1	50-59 years	PFIZER\BIONTECH	death - Non-ST elevation (NSTEMI) myocardial infarction	No lab data for this event. No prior vaccinations for this event.
1375926-1	50-59 years	JANSSEN	Patients wife stated he was found dead on floor the morning of 6/1/21 and exact time of death was unknown. It sounded like cause was unknown.	n/a No prior vaccinations for this event.
1377674-1	50-59 years	MODERNA	Sudden Cardiac Arrest . Resuscitated and transferred to the hospital. Never regained consciousness and died on 5/11/21.	No lab data for this event. No prior vaccinations for this event.
1378531-1	50-59 years	PFIZER\BIONTECH	Ventricular tachycardia with a pulse. Cardioversion x 3, Amiodarone 300mg IVP, Lidocaine 100mg IVP, Amiodarone drip & Levophed drip started.	Monitor: Ventricular Tachycardia with a pulse. After 3 cardioversions, did convert into Atrial Fib with RVR, but was hypotensive 56/42. No prior vaccinations for this event.
1381990-1	50-59 years	PFIZER\BIONTECH	death J18.9 - Pneumonia, unspecified organism E87.1 - Hypo-osmolality and hyponatremia	No lab data for this event. No prior vaccinations for this event.
1385311-1	50-59 years	MODERNA	Initially sore arm; severe headache. positive COVID test on 1/21/2021 - doctors assume he was positive at time of vaccination but we didn't know it yet; severe covid pneumonia; supraventricular tachycardia; diabetes; iron deficiency anemia	positive COVID test 1/21/2021 No prior vaccinations for this event.
1386585-1	50-59 years	PFIZER\BIONTECH	06/08/2021-Received vaccine at Urgent Clinic. Pt found down at home. Brought to Hospital ED, with cardiac arrest (STEMI), where she later died.	06/08/21. WBC 12.4, Hgb 15, HCT 44, PLT 132, K+ 3.1,CL 101, GLUCOSE 405, CREATININE 1.35, CO2 18, TROPI 0.59, AST 114, ALT 81, ALP 152, ALB 2.4. No prior vaccinations for this event.
1388093-1	50-59 years	PFIZER\BIONTECH	Patient presented on 4/8 to Hospital for COVID pneumonia, transferred to another hospital on 4/21/2021. At Hospital, she was treated with convalescent plasma, course of remdesivir, and dexamethasone. She was requiring HFNC during day and BiPap overnight. She began to improve with decreasing O2 requirements on 4/15. On 4/17, she was found to have L-sided deficits and increasing hypoxia, which required emergent intubation. Dexamethasone was increased to 6 mg BID and she was started on Levaquin and Flagyl for aspiration pneumonia, consolidated to ertapenem on 4/20. She had been on Eliquis prior to this, but this was discontinued after she developed the stroke sx on 4/17, switched to Lovenox. Initial head CT negative, but repeat head CT on 4/19 showed large R sided MCA territory infarct. She was placed on ASA. 4/21 head CT showed edema and mild midline shift. Neurology was consulted, who recommended hyperventilation, 3% saline, and elevating HOB > 30 degrees. She was then transferred to St. Mary's ICU on 4/21. At Hospital, patient was treated for aspiration pneumonia (cefepime 2g Q8H on 4/22-4/25, meropenem 2g once on 4/22, tobramycin 400mg daily on 4/22-4/23) and COVID. However, she had significant difficulty weaning from mechanical ventilation. Given her prolonged course and her right MCA CVA with significant deficits it was predicted that she would need long term ventilatory support therefore PEG and tracheostomy were placed on 4/29. She remained relatively stable until 5/2 AM when she suddenly developed massive subcutaneous emphysema and hypoxia. It was suspected that her tracheostomy had become dislodged. Patient was re-intubated orally with difficulty however there was no color change with EtCO2 and patient was in cardiac arrest. CPR was briefly performed however code status was clarified and patient was DNR. Trauma surgeon and intensivist were in agreement that any other interventions would be futile. Time of death was 0645 on 5/2/21. No lab data for this event. No prior vaccinations for this event.
1391500-1	50-59 years	MODERNA	Patient had his 2nd Moderna vaccine at pharmacy at 2:00 and was struggling to breathe a few hours later. We were at the emergency room around 6:00pm and he was placed on a ventilator between midnight and 1:00am. He died 10 days later after experiencing clots that led to seizures and congestive heart failure. I have a death certificate if needed.	Yes, extensive. You will need medical records. He had 3 covid tests and 1 antibody test all negative for Covid. No prior vaccinations for this event.
1391711-1	50-59 years	MODERNA	Death Certificate 4/22/2021 Cause of Death - Hypertensive Cardiovascular Disease	No lab data for this event. No prior vaccinations for this event.

Note: Submitting a report to VAERS does not mean that healthcare personnel or the vaccine caused or contributed to the adverse event (possible side effect).

Notes:

Caveats: VAERS accepts reports of adverse events and reactions that occur following vaccination. Healthcare providers, vaccine manufacturers, and the public can submit reports to VAERS. While very important in monitoring vaccine safety, VAERS reports alone cannot be used to determine if a vaccine caused or contributed to an adverse event or illness. The reports may contain information that is incomplete, inaccurate, coincidental, or unverifiable. Most reports to VAERS are voluntary, which means they are subject to biases. This creates specific limitations on how the data can be used scientifically. Data from VAERS reports should always be interpreted with these limitations in mind.

The strengths of VAERS are that it is national in scope and can quickly provide an early warning of a safety problem with a vaccine. As part of CDC and FDA's multi-system approach to post-licensure vaccine safety monitoring, VAERS is designed to rapidly detect unusual or unexpected patterns of adverse events, also known as "safety signals." If a safety signal is found in VAERS, further studies can be done in safety systems such as the CDC's Vaccine Safety Datalink (VSD) or the Clinical Immunization Safety Assessment (CISA) project. These systems do not have the same limitations as VAERS, and can better assess health risks and possible connections between adverse events and a vaccine.

Key considerations and limitations of VAERS data:

- Vaccine providers are encouraged to report any clinically significant health problem following vaccination to VAERS, whether or not they believe the vaccine was the cause.
- Reports may include incomplete, inaccurate, coincidental and unverified information.
- The number of reports alone cannot be interpreted or used to reach conclusions about the existence, severity, frequency, or rates of problems associated with vaccines.
- VAERS data are limited to vaccine adverse event reports received between 1990 and the most recent date for which data are available.
- VAERS data do not represent all known safety information for a vaccine and should be interpreted in the context of other scientific information.

Some items may have more than 1 occurrence in any single event report, such as Symptoms, Vaccine Products, Manufacturers, and Event Categories. If data are grouped by any of these items, then the number in the Events Reported column may exceed the total number of unique events. If percentages are shown, then the associated percentage of total unique event reports will exceed 100% in such cases. For example, the number of Symptoms mentioned is likely to exceed the number of events reported, because many reports include more than 1 Symptom. When more then 1 Symptom occurs in a single report, then the percentage of Symptoms to unique events is more than 100%. More information.

Data contains VAERS reports processed as of 06/11/2021. The VAERS data in WONDER are updated weekly, yet the VAERS system receives continuous updates including revisions and new reports for preceding time periods. Duplicate event reports and/or reports determined to be false are removed from VAERS. More information.

Values of Event Category field vary in their availability over time due to changes in the reporting form. The "Emergency Room/Office Visit" value was available only for events reported using the VAERS-1 form, active 07/01/1990 to 06/29/2017. The "Congenital Anomaly/Birth Defect", "Emergency Room", and "Office Visit" values are available only for events reported using the VAERS 2.0 form, active 06/30/2017 to present. These changes must be considered when evaluating count of events for these categories.

For more information on how many persons have been vaccinated in the US for COVID19 to date, see https://covid.cdc.gov/covid-data-tracker/#vaccinations/

Help: See The Vaccine Adverse Event Reporting System (VAERS) Documentation for more information.
